

We turn a phone number into **an accurate routing decision** — in real time.

num-iD provides real-time number intelligence and routing data to the world's leading carriers, messaging hubs, fintech and identity platforms. Independent, telecom-only, engineered for throughput.

HLR RESPONSE

100+
COUNTRIES IN PRODUCTION

99.95%
SUCCESS RATIO

TWO PRODUCTS. ONE ENDPOINT.

Identify **MNP**

Know which network owns the number **today**. Range data alone is wrong for **40%+ of mobile traffic**.

- SMS routing optimization
- Voice termination
- A2P / RCS / VoLTE routing
- Off-net surcharge avoidance

Verify **HLR**

Check if the number is alive, right now. Reachability + roaming + serving network in real time.

- Pre-send SMS validation
- Fraud / ATO prevention
- KYC / sign-up checks
- Cleaning marketing lists

WHO USES US

Carriers & interconnect

Route voice and SMS to the correct terminating network.

A2P messaging hubs

Validate destinations before send; protect deliverability KPIs.

MNOs and MVNOs

Identify portability and roaming context for traffic decisions.

CPaaS & voice

Cost-aware routing across destinations and operators.

Contact centers

Reach the right operator with the right routing rules.

Fintech & ID&V

Stop fraud the moment a number tries to authenticate.

WHY NUM-ID

Telecom-only

Focused product. Not a generic API gateway.

Engineering-first

Built by telecom engineers. New countries in <2 weeks.

Independent

No parent-co. Customer-led roadmap.

Human support

Real engineers on the line. Never a chatbot.
